

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A method comprising:  
providing a first set of categories of broadcasted programs;  
providing a second set of categories of broadcasted programs; and  
adding a first category from the first set to ~~a the~~ second set of categories of broadcasted programs in response to ~~selecting the category from the first set and tuning a broadcasted program viewing device to a broadcasted program fitting into the first~~ category of the first set of categories a predetermined number of times, wherein the predetermined number of times is greater than 1, for a period of time at least equal to a first predetermined threshold, to at least one broadcasted program predetermined to be in the category from the first set.
2. (Currently Amended) The method of claim 1, further comprising:  
removing a second category from the second set upon a selecting of the second category from the second set.
3. (Currently Amended) The method of claim 1, further comprising:  
removing a second category from the second set upon a broadcasted program viewing device not being tuned, for a period of time at least equal to a ~~second-first~~ predetermined threshold, to at least one broadcasted program predetermined to be in the second category from the second set.
4. (Currently Amended) The method of claim 1, further comprising:

tuning a broadcasted program viewing device to a channel on which a broadcasted program predetermined to be in a second category from the second set will be broadcasted within a predetermined threshold of a current time.

5. (Currently Amended) The method of claim 1, further comprising:

tuning a broadcasted program viewing device, upon a singular pressing of a button, to a channel on which a broadcasted program predetermined to be in a second category from the second set will be broadcasted within a predetermined threshold of a current time.

6. (Currently Amended) The method of claim 1, further comprising:

verifying the adding of the first category from the first set to the second set including receiving user input confirming the addition of the first category.

7. (Currently Amended) ~~A machine-readable medium~~ One or more computer-readable media storing instructions that, that provides instructions that, when executed by a machine processor, cause the machine processor to perform ~~operations~~ a method, comprising:

providing a first set of categories of broadcasted programs;

providing a second set of categories; and

adding a first category from the first set to ~~a~~ the second set of categories of broadcasted programs in response to ~~selecting the category from the first set and tuning~~ a broadcasted program viewing device to a broadcasted program fitting into the first category of the first set of categories a predetermined number of times, wherein the predetermined number of times is greater than 1, for a period of time at least equal to a

~~first predetermined threshold, to at least one broadcasted program predetermined to be in the category from the first set.~~

8. (Currently Amended) ~~The machine-readable medium~~one or more computer-readable media of claim 7, wherein ~~operations~~the method further comprises:  
removing a second category from the second set upon a selecting of the second category from the second set.

9. (Currently Amended) ~~The machine-readable medium~~one or more computer-readable media of claim 7, wherein ~~operations~~the method further comprises:  
removing a second category from the second set upon a broadcasted program viewing device not being tuned, for a period of time at least equal to a ~~second~~first predetermined threshold, to at least one broadcasted program predetermined to be in the second category from the second set.

10. (Currently Amended) ~~The machine-readable medium~~one or more computer-readable media of claim 7, wherein ~~operations~~the method further comprises:  
tuning a broadcasted program viewing device to a channel on which a broadcasted program predetermined to be in a second category from the second set will be broadcasted within a predetermined threshold of a current time.

11. (Currently Amended) ~~The machine-readable medium~~one or more computer-readable media of claim 7, wherein ~~operations~~the method further comprises:  
tuning a broadcasted program viewing device, upon a singular pressing of a button, to a channel on which a broadcasted program predetermined to be in a second

category from the second set will be broadcasted within a predetermined threshold of a current time.

12. (Currently Amended) The ~~machine-readable medium~~ one or more computer-readable media of claim 7, wherein ~~operations~~ the method further comprises:

verifying the adding of the first category from the first set to the second set including receiving user input confirming the addition of the first category.

13. (Currently Amended) A system comprising:

a first unit to provide a first set of categories of content of broadcasted programs; and

a second unit coupled with the first unit to add a category from the first set to a second set of categories of broadcasted programs in response to selecting the category from the first set and tuning a broadcasted program viewing device, for a period of time at least equal to a first predetermined threshold, to at least one broadcasted program predetermined to be in the category from the first set, wherein the second unit further includes a user verification wherein a user approves the category from the first set being added to the second set prior to the category being added.

14. (Original) The system of claim 13, wherein the second unit is also to remove a category from the second set upon a selecting of the category from the second set.

15. (Original) The system of claim 13, wherein the second unit is also to remove a category from the second set upon a broadcasted program viewing device not being

tuned, for a period of time at least equal to a second predetermined threshold, to at least one broadcasted program predetermined to be in the category from the second set.

16. (Original) The system of claim 13, wherein the second unit is also to tune a broadcasted program viewing device to a channel on which a broadcasted program predetermined to be in a category from the second set will be broadcasted within a predetermined threshold of a current time.

17. (Original) The system of claim 13, wherein the second unit is also to tune a broadcasted program viewing device, upon a singular pressing of a button, to a channel on which a broadcasted program predetermined to be in a category from the second set will be broadcasted within a predetermined threshold of a current time.

18. (Cancelled)

19. (New) The method of claim 1, wherein the first and second sets are located in a set top box.

20. (New) The system of claim 13, wherein the first and second units are located in a set top box.
